Ion Para

07882241476| Norfolk, UK

www.linkedin.com/in/ion-para-934261211/   para_ion@hotmail.com

A full stack web developer currently seeking junior or graduate web development roles. Possesses strong work ethics, commitment, dedication and able to work in high-pressure and challenging environments. Previous experience of working in a team for over six years as well as possessing a strong self-directed learning skill which was developed while studying software development.

Key skills:

- Frontend web development in HTML, CSS, JavaScript
- Single-page application development with React.js
- Web API integration
- Object-oriented programming

- Full stack application development with MERN stack
- Software development in JavaScript
- Git & Github
- Source version control

Projects

Just Read store (MERN, CSS, Tailwind, Google books API): https://just-read.onrender.com/
- This app contains a books store. The app allows for the user to login / signup and search for his / her favourite book, purchase a book and leave a review.

To-Do App (MERN, CSS, React-Bootstrap): https://todo-app-g1mr.onrender.com/
- This project contains a full stack web application. The app is interactive and it lets the user to login / signup, add, remove, and update their to do list in the app as well as in the database.

Hangman Game (JavaScript, React.js, React-Bootstrap, CSS): https://hangman-game-101.netlify.app/
- This project contains the "Hangman" game. The goal of this project is to consolidate all previously learned concepts about building web applications with React, JSX and JavaScript.

Just Fight (HTML, CSS, Bootstrap, JavaScript): https://ionpara.github.io/Just-Fight/
- The project contains a website built to showcase a hobby; the goal is to provide information about the experience working on the front-end side using object-oriented design.
