📍 **Downham Market, Norfolk**

SUMMARY

A full stack web developer currently seeking junior or graduate web development roles. Possesses strong work ethics, commitment, dedication and able to work in high-pressure and challenging environments. Previous experience of working in a team for over six years as well as possessing a strong self-directed learning skill which was developed while studying software development.

EXPERIENCE

FULL STACK WEB DEVELOPER

HyperionDev

📅 12/2022 - 03/2023   📍 Remote

🔗 https://www.hyperiondev.com/portfolio/107300/

Bootcamp

- Successfully completed a portfolio of 62 tasks.
- Demonstrated extensive knowledge and hands-on experience in a variety of front-end technologies, including *JavaScript, HTML, CSS, React,* and frameworks such as *Bootstrap* and *Tailwind*.
  Portfolio Project (JS, React.js, CSS, Tailwind),
  Just Fight (HTML, CSS, Bootstrap, JS).
- Designed and developed a full stack MERN application from scratch.
- Built the frontend of the application using React.js and Redux for state management.
- Integrated third-party APIs such as *Google API* and *Rapid API*.
- Created a *MongoDB* database schema and models for storing and retrieving data.
- Used *Express.js* to build RESTful APIs for CRUD (create, read, update, delete) operations on database resources and implemented user authentication and authorization using *JSON Web Tokens (JWT)*.
  Just Read (MERN, CSS, Google API, JWT),
  To-do App (MERN, CSS, JWT).
- Developed strong problem-solving skills, allowing for efficient identification and resolution of issues in existing programs, ensuring smooth operations and an optimal user experience.
- Demonstrated effective project management skills by prioritizing tasks to complete projects within tight deadlines while maintaining high-quality work.
